

## Our Offerings:

### Film and Media Literacy Residencies

Take Two Film Academy provides Teaching Artists to come to your school and work with your teachers and students to add filmmaking and media literacy into a unit of study or for enrichment programming.

### Professional Development

Take Two Film Academy provides professional development training for teachers and administrators on how to bring the "Third Dimension of Literacy" into your classrooms. This can be delivered in person, remotely, purchasing our book or via our LMS site [www.taketwou.com](http://www.taketwou.com).

### Professional Videos

We work with schools and programs to create marketing videos that showcase an initiative, event or call to action (with or without student involvement).

## Residencies and After-School

(Most can be adapted for K-12 curricula and infused with Media Literacy Training)

### Classic Filmmaking

(Intro and Advanced)

Students will collaborate on scripts, film and edit a mini movie that everyone had a hand in creating!

### Documentary

Students work alone or in groups to make social action, historical, investigative, personal or "Ted Talk" style documentaries about a unit of study or something that interests them.

### Music Videos

Students will design a video set to music of their choice (including an original song) and learn techniques commonly used in music videos such as visual effects and unique lighting set ups.

### Become an Internet Star

Students will learn what it takes to create high quality Youtube and TikTok videos like a professional!

### Special Effects

Students will transport themselves anywhere in the world with a green screen, then add lasers and explosions!

### TV Production

Students create the beginning to end of a series. Students will write, shoot and edit each episode. Students develop a small series arc for an episodic mini series. Students may also model popular show types such as cooking shows, game shows, survival shows, or SNL sketches!

### Music production and podcasting

Students will create their own podcast and learn how to research, record and edit their work - including sound design and music selection.

### SFX makeup

Students will learn professional methods to apply special effect makeup just like some of the characters in their favorite movies.

### Comic Book Creation

Learn the craft of legends like Stan Lee, Neil Gaiman, and many more responsible for the stories that grew from the pages of comics into the biggest blockbusters of the industry.

## Great for K-2nd Grade

### Character Creation

Students will develop characters using themselves or inanimate objects and work with their fellow classmates to create original stories that they will shoot and edit!

### Puppetry

Students will build puppets of their own to go on the wildest adventure of their choice in a story and movie they create themselves or with a group.

### Animation

Students will learn stop motion, rotoscoping and pixilation to create animated shorts. We can even incorporate animated characters in with live action!
